

Introduction

ROCKWOOL Limited is the UK subsidiary of the ROCKWOOL Group, the world's leading producer of stone mineral wool insulation products that provide thermal insulation, fire protection and acoustic performance. Our products are made from natural, recyclable stone making them durable and sustainable.

ROCKWOOL Limited aims to produce stone wool insulation in a safe and efficient manner that meets customers' requirements and conforms to relevant standards and legislation while upholding company values.

Procedures

The Management Team is committed to promoting efficient use of energy and achieves this by:

- Monitoring energy use and driving continual improvement by setting targets on an annual basis.
- Ensuring the availability of sufficient information and resources to meet those targets.
- Complying with all applicable legislation and other requirements.
- Targeting energy saving potential and implementing cost effective energy saving measures.
- Ensuring energy efficiency is a factor that is taken into consideration when procuring equipment, products and services.
- Operating and maintaining an energy management system that is certified to ISO 50001:2011 with the aim of successfully transitioning to ISO 50001:2018 by August 2021.
- Improving practices to support the ROCKWOOL Group in meeting its long term Sustainability Goals.

This policy forms the basis of the Energy management system on which objectives and targets are set and reviewed annually at the Management Review.

Responsibilities/Organisation

- Directors and Senior Managers have prime responsibilities to ensure that energy matters are considered and properly managed within their respective business areas.
- Department heads are responsible for ensuring business processes and systems are fully applied in order to minimise energy consumption.
- The Operations & Sustainability PMO is responsible for producing and maintaining policies & procedures which support this policy, for assisting operational management to achieve these criteria, and for monitoring and reporting on compliance.
- Employees must take all reasonable care affected and in doing so act with due consideration for the energy. In doing so employees must bring to attention of management any practices or conditions that may incur unnecessary energy consumption.
- Employees must not interfere with or misuse anything which is provided in the interests of energy efficiency, and must bring to the notice of their managers any matters which may affect energy efficiency.

Darryl Matthews
Managing Director
