

Introduction

ROCKWOOL Limited is the UK subsidiary of the ROCKWOOL Group, the world's leading producer of stone mineral wool insulation products that provide thermal insulation, fire protection and acoustic performance. Our products are made from natural, recyclable stone making them durable and sustainable.

ROCKWOOL Limited aims to produce stone wool insulation in a safe and efficient manner that meets customers' requirements and conforms to relevant standards and legislation while upholding company values.

Procedures

The Management Team is committed to protecting the environment and achieves this by:

- Maintaining an environmental management system that is certified to ISO 14001:2015.
- Driving continual improvement in the business.
- Investing in processes and equipment that prevent pollution and minimise emissions to air, land and water.
- Making a commitment to prevent, reduce, re-use and recycle waste arising from the manufacture of our products and assisting our customers to do the same by offering a recyclable product.
- Complying with all relevant legislation, guidance documents and codes of practice.
- Improving practices to support the ROCKWOOL Group in meeting its long term Sustainability Goals.
- This policy forms the basis of the environmental management system on which objectives and targets are set and reviewed annually at the Management Review.

Responsibilities/Organisation

- Directors and Senior Managers have prime responsibilities to ensure that environmental matters are both considered and properly managed within their respective business areas.
- Department heads are responsible for ensuring business environmental processes and systems are fully applied in order to protect and minimise impact upon the environment.
- The Operations & Sustainability PMO is responsible for producing and maintaining policies & procedures which support this policy, for assisting operational management to achieve these criteria, and for monitoring and reporting on compliance.
- Employees must take all reasonable care affected and in doing so act with due consideration for the environment. In doing so employees must bring to attention of management any unsafe practices or conditions that may impact upon the environment.
- Employees must use procedures or equipment provided and must not interfere with or misuse anything which is provided in the interests of environment protection, and must bring to the notice of their managers any matters which may impact upon the environment.

Darryl Matthews
Managing Director
